L'ORÉAL

DATA ANALYTICS OR MANAGEMENT INTERNSHIP OPPORTUNITIES (Réf 486)

Several internship opportunities exist within Global Beauty Tech: Discover which one is the one for you while discussing with our recruiter! Our mission: offering you an amazing, personalized experience inside our tech entity. A real kick-start for your career!

Didn't imagine L'Oréal as an amazing Tech Company? Wait a minute! 😊

L'Oréal is present in 130 countries on five continents. For more than a century, L'Oréal has devoted itself solely to one business: create beauty that moves the world; it is now the industry world leader with €29 billion consolidated sales.

Today, L'Oréal includes **1700 tech positions** and it's constantly growing. Especially with our ambition to become the **#1 BeautyTech company**, meaning inventing the beauty of the future while becoming the company of the future.

To achieve this ambition, L'Oréal needs to continue recruiting many **diverse, innovative, skilled** and **passionate** minds in different tech domains such as Data, Digital, Cloud, Cyber Security, IT Architecture, DevOps, Applications and Infrastructure.

👁️ What does it look like to work in data at L'Oréal?

Well, first it depends on your preference! You could either be a Data Analytics or a Data Manager.

Let's highlight the fact that positions at L'Oréal constantly evolve and adapt to our changing environment. But here is a sample of what you can do as part of a Data Analytics or Data Management team:

- **Data Management**
- Coordinate Data projects according to your team's main challenges
- Discover the data world and the multicultural organization of L'Oréal
- Be a team driver by transforming data into reports, objectives, or guidelines for teams
- Identify and put in place best practices within your division and the Group
- Participate to the continuous improvement of solutions in agile mode

FICHE DE POSTE

- **Data Analyst**
- Identify business needs
- Collect and formalize user needs
- Prepare data and build a data pipeline
- Data processing and optimization for a better user experience
- Ensure data collection, quality and retention
- Build data analysis solutions
- Help decisions through Data visualization and analysis
- Solution deployment in agile mode
- Help to development process automatization to accompany teams
- Be a rock support by constantly following-up data quality

♥ Data is a perfect match for you if you:

- Are currently enrolled in an engineering or business school (with a Data specialization)
- Consider data as an infinite adventure and have data visualization skills
- Are business oriented
- Are curious and collaborative with a sense of popularization and argumentation
- Have a good level of English
- MS Excel and PowerPoint skills required
- One Data Visualization tool such as Power BI, Looker, Tableau, Click View is a must have!

Hey, this is nice to have!

Experience with scrum framework (agile methodology)

Ready to build the future of L'Oréal together? [Apply now!](#)

You want to know more? Take a look at this:

Joining L'Oréal means joining a company that:

1. Invests in Tech and positions its Tech teams at the heart of its transformation strategy.
2. Allows its employees to have a real impact, to test their ideas, to innovate and to build our future.
3. Has a powerful and innovative HR policy: a very dynamic mobility policy, significant investment in employee training, regular re-evaluation of remuneration, numerous innovative HR measures: Time Savings Account, paternity leave, Citizen Day, etc.

FICHE DE POSTE

4. Has chosen to uphold strong values and to be particularly advanced from a social and environmental point of view (strong diversity and inclusion policy, L'Oréal for the Future program, commitment to numerous communities, etc.).
